

MEDIA RELEASE**Avaya selects CarbonView as its carbon management solution**

FOR IMMEDIATE RELEASE

Dallas, TX, 1 December 2009 – Viewlocity Technologies announced today that Avaya, a global leader in enterprise communications systems, has selected Viewlocity Technologies' CarbonView solution to efficiently measure and manage carbon emissions for the company's global operations. CarbonView, a leading carbon management and accounting solution, will vastly improve data collection and analysis for Greenhouse Gas Protocol scope 1, 2 and 3 emissions for Avaya as well as manage energy efficiency and carbon abatement projects.

In commenting on the selection of CarbonView, Geoffrey Baird, Vice President of Product Operations and Sustainability Officer at Avaya, had this to say; "Avaya is delighted to have selected the CarbonView solution. Avaya has been looking for the right tools to support our internal sustainability goals while keeping our employees focused on our core competencies. This system will provide cost effective data collection and management of carbon emission data.

CarbonView provides the information and decision support tools necessary to manage our carbon emissions and prioritize carbon abatement projects. CarbonView will be a fundamental tool for the continuous improvement of our sustainability practices across our global operations."

Teresa Finn, Vice President, Operations of Viewlocity Technologies adds: "Avaya is an industry leader in enterprise communications systems and we are excited that they selected CarbonView as their carbon accounting and management system. CarbonView will enable Avaya to assess carbon emissions and identify emission hotspots that present the greatest opportunity for improvement".

CarbonView is well suited to support sustainability initiatives for global companies, such as Avaya, as it easily integrates carbon emissions management into business operations. The web-based software enables businesses to systematically collect and manage emissions data to assist them in realizing cost benefits from efficiency improvements. The ability for CarbonView to measure, monitor and, therefore, mitigate carbon emissions also provides companies with a platform for sustainability compliance programs.
